The main goal of a manufacturing business is exponential growth. Always stay striving toward increasing profits, connecting with other companies, and building your brand.

.....

ABOUT US

- Established in the year 2007, we, “Shree Ram Engineers”, are engaged in manufacturing and supplying a wide array of Industrial Vessels, Heat Exchangers, Air Receivers & Dryers, Heavy Structure Works, Storage Tanks and Industrial Reactors. Our comprehensive range comprises Pressure Vessels, Stainless Steel Vessels, Limped Coil Pressure Vessels, Surface Condensers, Shell And Tube Heat Exchangers and Double Tube Sheet Heat Exchanger. In addition to this, we offer Oil Coolers, U Tube Heat Exchangers, Straight Heat Exchangers, Air Receivers and many more. These products are manufactured using supreme quality stainless steel and latest technology machines. Our products are acknowledged for their striking features such as low power consumption, corrosion resistance, perfect finish, trouble-free performance, smooth operations, longer service life and sturdy construction. We offer these products in different sizes, shapes and other specifications to our patrons, who are spread all around the nation. Apart from the products, we render Fabrication Services and Maintenance & Retubing Services. These services are known for their timeliness, flexibility and reliability.

CHAIRMAN DETAILS

- **Mr. DINESHBHAI S PANCHAL.** Our professional team handles our all customer's query from Ahmedabad, Gujarat. We manufacture high tech classifier equipments, crushing and grading equipments and drying equipments. We give assurance that our product is made with great quality, take care of all safety precautions, stylish design and reliable price.

- This customer-centric approach has made our name to be known across the country and enabled us to become a certified organization responsible for manufacturing world-class equipment. With our commitment to make our customers satisfied, we inaugurated our company and feel proud after experiencing huge appreciation of our valued customers.

- **Detail of Work Carried:**

We are also working in **M/S. PATELS AIR TEMP (I) LTD. AHMEDABAD** since last 10 years as a Labour Contractor

Complete fabrication, Welding, Assembly, Testing, Cleaning, Painting, Unloading and Loading of the **Heat Exchangers and Pressure Vessels**

1. Shell and Tube type Heat Exchanger

Shell- 18 mm thk X 1211 OD X 5314 mm long. Tube size-25.4 mm OD X 2.11 mm thk X 850 Nos. qty. MOC of Shell is SA-516 and for Tubes SA-179 Weight-21000 kgs. For IOCL Barauni Stage wise inspection by CEIL

MISSION & GOALS

- The main goal of a manufacturing business is exponential growth. Always stay striving toward increasing profits, connecting with other companies, and building your brand.
- The climb never ends, and if you feel like you've reached the top of your game, then just keep pushing. There are always ways to perform better, produce more, and become a larger company.
- We will always strive to service our customer with the utmost integrity, and to their complete satisfaction. It is our goal to ensure our mission by continuous self improvement, growth in our operations and employees; while maintaining profitability to the benefit of our customers, employees, and community

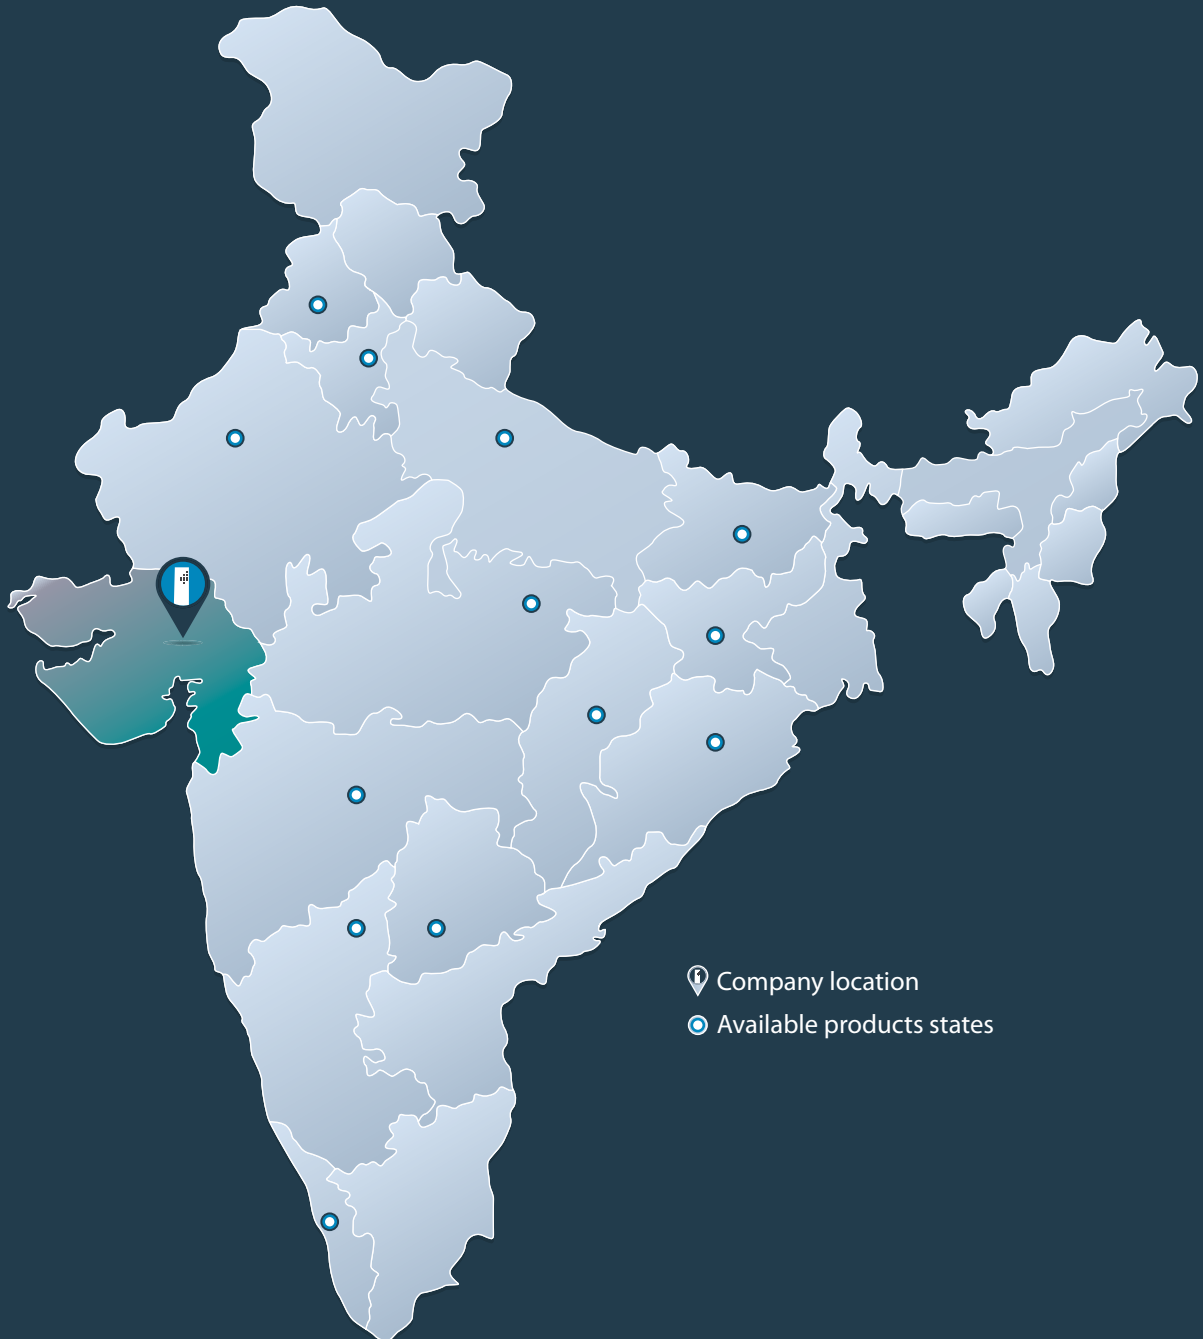

VISION

- We will always strive to service our customer with the utmost integrity, and to their complete satisfaction. It is our goal to ensure our mission by continuous self improvement, growth in our operations and employees; while maintaining profitability to the benefit of our customers, employees, and community

OUR PRESENCE

📍 Location:- Plot No. 280, Road No. 2, GIDC, Kathwada GIDC, Ahmedabad-382430, Gujarat, India

PRESSURE VESSELS

- We are engaged in offering a comprehensive range of **Pressure Vessels** to the clients. These products are manufactured using superior grade raw material and advanced machines. We manufacture these products in accordance with the international quality standards. These products are available in several specifications in the nationwide market.

VACCUM FURNACE

- Vacuum furnaces are used in a wide range of applications in both production industries and research laboratories. At temperatures below 1200 °C, a vacuum furnace is commonly used for the heat treatment of steel alloys. Many general heat treating applications involve the hardening and tempering of a steel part to make it strong and tough through service.

STORAGE TANK

- We are instrumental in offering a wide array of **Storage Tank** to the clients. All our products are manufactured using supreme quality raw material and latest machines. These products are available in various specifications in order to fulfill the variegated demands of our customers. Further, these products are checked on different parameters by our quality inspectors before final dispatch.

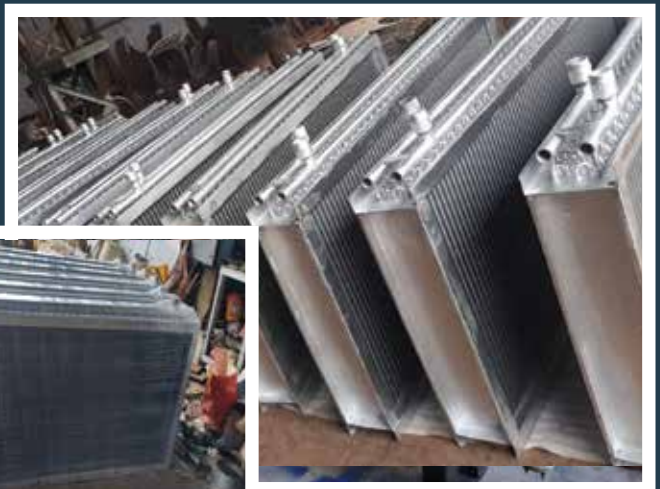

SURFACE CONDENSER

- Owing to our years of experience, we are able to offer a wide array of **Surface Condensers** to our respected clients. Superior quality raw material and high edge machines are used in the manufacturing process. The products offered by us are in strict compliance with the global quality standards. Available in varied specifications.

RADIATOR

- We are among the recognized firms engaged in offering a comprehensive range of **Heat Exchangers** to the patrons. These products are manufactured using superior quality raw material, which is obtained from renowned vendors of the industry.

HEAT EXCHANGER

- The shell-and-tube heat exchanger is by far the most common type of heat exchanger used in industry.
- It can be fabricated from a wide range of materials both metallic and non-metallic.
- Design pressures range from full vacuum to 6,000 psig.
- Design temperatures range from -250oC to 800oC.
- The shell-and-tube design is more rugged than other types of heat exchangers. It can
- stand more (physical and process) abuse.

Shell & Tube Heat Exchangers can be used as condensers, reboilers, process heaters and coolers.

Manufacturing of All types of Heat Exchangers (Shell and tube type , U type Heat exchanger

TUBE BUNDLE

- We are a well known firm offering Tube Bundle to our clients. Not just is constructed robustly but has long service life as well. Designed with high quality material under the supervision of our talented and skilled team who assures the best quality and scheduled delivery to our clients, these bundles undergo test on various quality parameters before dispatching the product.

ACCUMULATOR TANK

- Accumulators are used in many industries and Boardman has the expertise and capabilities to fabricate for any industry. As a market leader in our technical expertise in welding and steel processing, we have the ability to understand the most difficult customer specifications.

FILTER HOUSING

- We are Providing Filtration Solution for any Application in Air, Gas & Liquid. Dust Collection Bag & Dust Collection Cartridges. In addition, we export and supply SS Bag Filter Housing, SS Cartridge Filter, Housing, Pleated Dust Collection Bag, Pleated Dust Collection Cartridge, Oil Filter and Spun. These are extensively used in various industries and provide complete solutions for variegated filtration requirements. Our range is highly appreciated for high efficiency, sturdy construction, low maintenance and corrosion resistance. The array of products offered by us is in accordance with the international quality standards.

PYROLYSIS PLANT

• Offering a wide range of Waste Tyre Pyrolysis Plant and these plant are made of high grade raw material, these plants are availed to the customers in various specifications and widely appreciated by the customers owing to the following features:

- Durability
- Low Maintenance

Loading Capacity	15 Ton
Different Capacity	5 Ton ,10 Ton ,12 Ton ,15 Ton
End Products	Fuel Oil
Automation Grade	Semi-Automatic
Voltage	220 - 440 V
Brand	Shree Ram
Condition	New
Country of Origin	Made in India

Pyrolysis Plant

Way US ?

- **Our Quality**

The main motive of our organization is to offer quality range of Industrial Vessels, Heat Exchangers, Air Receivers & Dryers, Heavy Structure Works and many more to the clients. To achieve this objective, we manufacture all the products using premium grade stainless steel raw material, which is sourced from trustworthy vendors of the market. Further, we have a separate quality control department at our premises, which is handled by a team of experienced quality inspectors. These professionals keep an eye on the manufacturing process and assure that quality policies are followed at every level. Furthermore, these professionals check these products on numerous parameters before final shipment.

- **Mentioned below are some of the factors on which our products are checked:**

- Performance
- Construction
- Corrosion resistance
- Leak resistance

- **Client Satisfaction**

Being a customer-oriented firm, we work hard to attain 100% client satisfaction by offering quality range of Industrial Vessels, Heat Exchangers, Air Receivers & Dryers, Heavy Structure Works and many more. For this reason, we manufacture these products using optimum quality raw material, which is procured from trusted vendors of the market. Further, we make sure that clients receive defect-free range; thus, check the products on different parameters before final dispatch. In order to maximize customer satisfaction level, we also offer customization of our products. Furthermore, we have recruited C&F agents across the country, who help us in making timely delivery of consignments at customers' specified destination.
